

SHRUBS & TREES

Sumac (*Three leafed, Staghorn, Tiger Eyes, Gro Low*) - Many varieties from groundcovers to small trees. Fabulous fall color on all kinds!

Ohio Buckeye - Beautiful, uniform shade tree offering spectacular fall foliage and interesting fruit.

Autumn Brilliance Serviceberry - A favorite of the birds, this native tree offers showy white flowers followed by edible berries and yes, you guessed it, brilliant autumn interest.

Multi-stemmed smaller growing tree.

Princess Kay Ornamental Plum - This hardy, smaller stature tree is stunning. Flowers appear before the leaves emerge and fall color is outstanding.

Hot Wings Maple - Smaller growing maple tree that is perfect for our harsh growing conditions. Bright red seed heads cover the tree in mid summer.

Red leafed Rose - Tough, hardy wild rose. Pink flowers, red foliage and great rose hips develop later in the summer.

PERENNIALS & GRASSES

Fall blooming perennial Asters - One of the last bloomers of the season. Great for insects, pollinators and that late season color.

Sedums - So many wonderful varieties to choose from. Sun and well drained soil.

Prairie Dropseed - Gorgeous, smaller growing native grass. A combination of the seed heads and the fall coloring make this a standout. Must have well drained soil.

Tufted Hair Grass - Smaller growing grass with grand seed heads. Use in masses, interplanted with summer blooming perennials, for maximum effect.

Goldenrod - Another winner among the pollinators. Pair with ornamental grasses for an attractive prairie look.
